Robot

When you hear someone say “robot”, you probably think of C-3PO in Star Wars or Optimus Prime in Transformers. Cartoons, movies and literature are full of ‘humanoid’ robots, made to look like humans. These artificial creatures that look like us feed abundantly our imagination.

Actually, today's robots have many functions. Sometimes they substitute humans in carrying out repetitive, unpleasant or dangerous tasks. Sometimes they help out, and other times they entertain.

The Robot exhibition explores the world of robotics: what is a robot? What are they made of? What's it for? What's at stakes when it comes to robotics? Open the panel and plunge into this enormous world!

This exhibition is aimed at humans aged 7 and over.
